

REMARKS/ARGUMENTS

The specification has been amended to define the frontward direction along which the circuit board is inserted, so no new matter is added.

5 Claim 1 has been amended to add the features that "the circuit board is inserted frontward" and "the inserted circuit board is relatively pushed by the card-ejecting slant surface and thus moved backward". The first feature is to define the inserting direction as the frontward direction substantially opposite to the backward direction. The second feature has been described on page 7, line 6 of
10 the original specification, so no new matter is added. In the amended claim 1, the frontward and backward directions are clearly defined.

 In US 5,836,780 patent, the slant surface cannot contact the card 200, as shown in FIG. 10. So, one of ordinary skill in the art may easily understand that the slant surface never pushes the card 200 backward after the card 200 is inserted
15 and rotated. In fact, the card 200 only contacts the fifth surface (specified in the office action by the examiner), and the vertical fifth surface cannot move the card 200 backward because it is vertical. Instead of being moved backward by the slant surface, the card 200 seems to be pushed frontward by the user after it is rotated toward the circuit board.

20

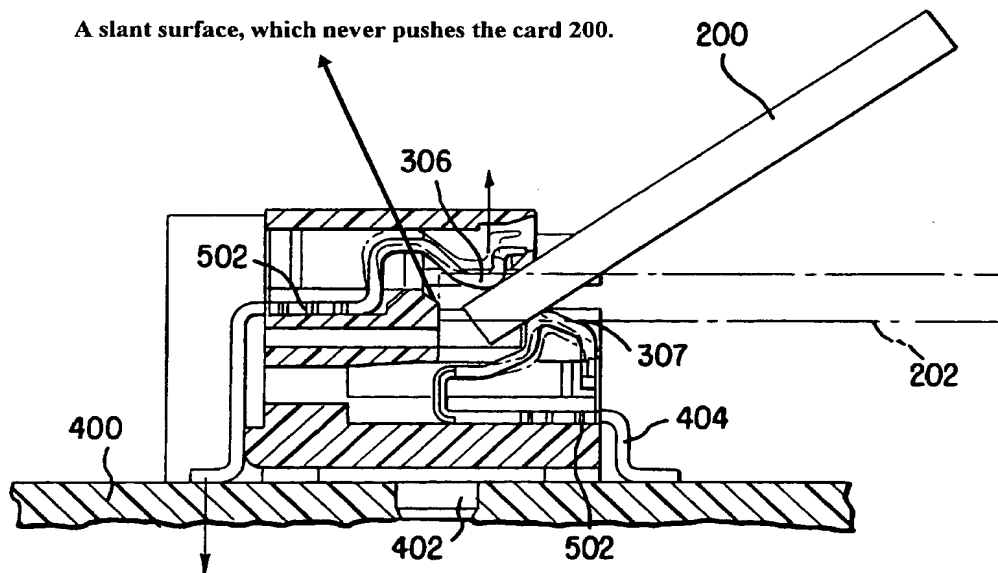

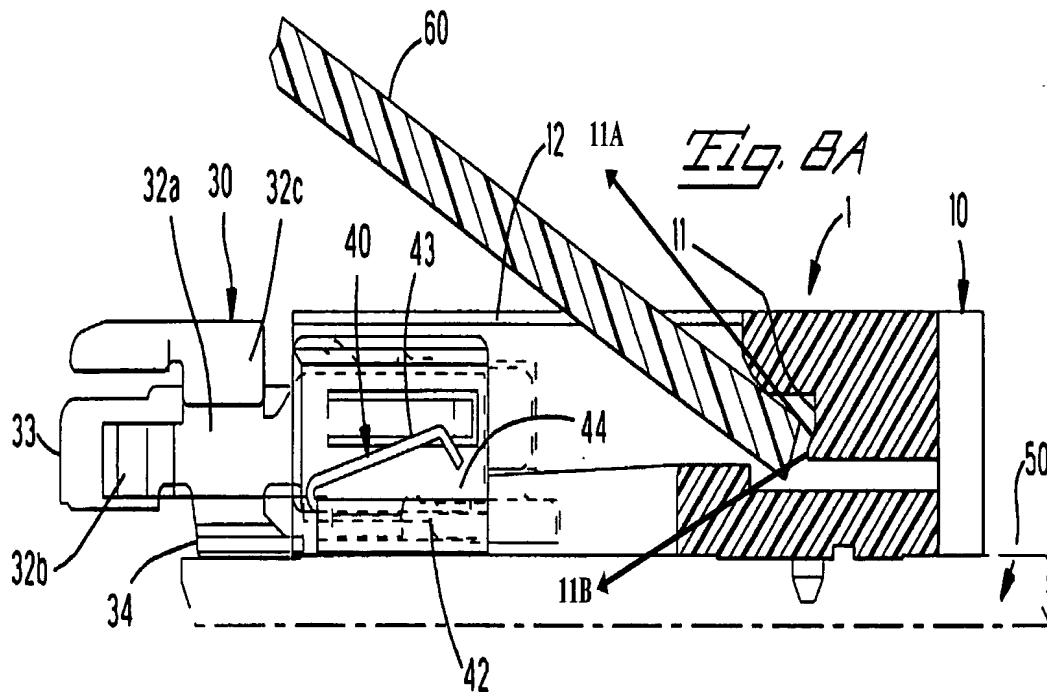

FIG. 10

It is to be noted that the daughter board 60 in US 6,176,725 patent also cannot be pushed by the slant surface 11A (specified in the following drawing) and thus moved backward after the board 60 is inserted and rotated. In fact, the vertical surface 11B (specified in the following drawing) contacts the board 60 and cannot move the board 60 backward after the rotation because it is vertical. Consideration of the amended Claim 1 and its dependent claims 2-7 is therefore politely requested.

Appl. No. 10/761,603
Amdt. dated May 9, 2005
Reply to Office action of 02/16/2005

In light of the above-mentioned amendments and remarks, Applicant now asserts that all of the grounds for rejection have been traversed or overcome by amendments, and that all of the present claims are in condition for immediate allowance. Applicant therefore requests reconsideration of the objections and rejections, and solicits allowance of the present claims at an early date.

Thank you for your consideration.

Respectfully submitted,

10 Date: 2005. 5. 9 Chou Hsuan TSAI
